Carving is an extraordinary symbiosis between the natural structure of wood and a variety on graphic design. The innovative Carving technology enables us to engrave classic, retro-modern and contemporary designs into naturally oiled wood surfaces. What used to be the rough sound of the Seattle music scene, today forms the unconventional design that is Carving Grunge I. Individuality and independence are the values that this design embodies. The striking surface structure draws attention to itself and thanks mainly to the individual design possibilities, makes it ideally suited for implementation in

corporate architecture.
