

Basic

The Basic collection contains all Oak floors which optically give a very natural appearance.

Cracks and knots, along with the general texture of the wood, are an important aspect when differentiating between the products.

The line-up runs from almost knotless surfaces up to deep cracks and large knots.

Thanks to the mafi thermal treatment, Vulcano offers a colour range from classical yellowy Oak colouring, to sophisticated brown tones and on to almost black floors.

Natural wooden floors made in AUSTRIA
