

Areas of use

All mafi natural wooden floors conform to the CE Guidelines in EN 14342. Despite the high durability of mafi floors, there are differences between the individual products.

The hardness of the woods is the deciding factor. Because of this, mafi offers three categories to be able to decide in which area the desired floor should be used:

- P1: Ideal for light to medium use: Bedrooms, Children's and Living rooms, or similar
- P2: ideal for medium to heavy use: Kitchens, Dining rooms, or similar
- O: Ideal for commercial areas. A professional consultation is recommended along with checking the expected installation area.
